

SUMMER CAMP

About Ivy Camps USA

At Ivy Camps USA, we're passionate about shaping the leaders of tomorrow by inspiring campers to explore new passions, embrace challenges, and grow with confidence. Our summer camps are designed to spark curiosity, build essential skills, and make learning exciting through fun!

With unique camp themes and carefully crafted programs led by enthusiastic instructors from top US universities, our camps inspire fearless exploration, collaboration, and creativity—all while creating unforgettable memories.

We can't wait to bring these incredible experiences to your child this summer!

Our Values & Priorities:

Foster a caring global community

Inspire curiosity and learning

Promote fearless experimenting

Value people and encourage diversity

Cultivate success through fun

CAMP LEARNING TOPICS:

Week 1: July 6 – 10

Option 1: Engineering: Game Design & Escape Rooms

Sharpen your logic and problem-solving skills in this exciting camp! You'll tackle brain-teasing puzzles, crack escape room challenges, and explore math concepts that strengthen your ability to think critically. Along the way, you'll learn how to design tricky challenges and build creative solutions. By the end, you'll put your skills to the test by designing and creating your very own escape room masterpiece!

Option 2: Building a Carnival: Teamwork in Leadership

Teamwork makes the dream work! In this program, you'll dive into the basics of running a business while building key skills like communication, problem-solving, organization, and budgeting. Your mission? Work together with your team to put on an exciting camp carnival! Along the way, you'll take part in fun team-building activities, trying on different roles and learning when to lead and when to follow. By the end of this program, you'll know how to collaborate, facilitate group activities, and use your strengths to help your team succeed!

CAMP LEARNING TOPICS:

Week 2: July 13 – 17

Option 1: Trick Shots: Physics in Action

Join us for an exhilarating adventure where engineering meets epic trick shots! In this program, you will learn about the engineering design process, as you solve fun challenges inspired by folktales and imaginative scenarios. Design and build unique structures while applying scientific concepts to bring your ideas to life. Then, take on jaw-dropping trick shot feats, uncovering the science behind trajectories, spin, and friction. By the end of this program, you'll design your own trick shot, master the physics behind it, and showcase your skills in front of your peers!

Option 2: Comic Book Design with Harry Potter

Step into the magical world of storytelling! Inspired by Harry Potter, you'll explore the science behind fantastical elements and design your own creative universe. Through art and writing principles, you'll build a cohesive magical world and write an original story. But that's not all—channel your creativity further by crafting your very own comic book! You'll learn how to develop compelling characters and use comic books as a unique medium for storytelling.

CAMP LEARNING TOPICS:

Week 3: July 20 – 24

Option 1: Take Charge! Leading as a CEO

Become a bold business leader in this exciting camp! You'll dive into the world of entrepreneurship, learning how to identify problems, create innovative solutions, and develop a winning business plan. Through hands-on activities, you'll sharpen your pitching skills and master the art of persuasion. At the grand finale, you'll step into the spotlight for a thrilling Shark Tank-style showdown, presenting your big idea to a panel of mock investors. By the end, you'll have the confidence and skills to bring your business vision to life!

Option 2: Launch Your Own Podcast

Dive into the world of podcasting in this exciting camp! You'll explore various types of podcasts and learn why this medium is taking the world by storm. Step by step, you'll master essential podcasting skills like crafting compelling stories, writing engaging interview questions, recording crisp audio, and speaking clearly to captivate your audience. By the end, you'll have all the tools to create, record, and launch your very own podcast that's sure to grab attention and keep listeners hooked!

CAMP LEARNING TOPICS:

Week 4: July 27 – 31

Option 1: Photography & Art in the World Around You

Look at the world in a whole new way! In this program, you'll turn everyday objects—like stones, leaves, pasta, and even push pins—into incredible works of art. Using creativity and resourcefulness, you'll transform the ordinary into something extraordinary. Then, you'll switch gears and explore the magic of photography, capturing the world through your camera lens. With hands-on projects and personalized feedback from your instructor, you'll develop the skills to create art and images that showcase your unique perspective!

Option 2: Get Messy: Sticky, Strange Science

In this camp, you will explore the science behind sticky, strange, and messy substances through hands-on experiments in chemistry, biology, and physics. You'll mix, stretch, squish, and test a variety of strange materials to understand their properties and reactions. Along the way, you'll make predictions, test hypotheses, and adjust your experiments based on your observations. The experience wraps up with the Messy Science Showcase, where you'll design and present your own science experiment and share your discoveries.
